ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: REFLECTOR

(57) Abstract: There is provided a reflector capable of reflecting light at a wide angle of incidence, for which the manufacturing time can be easily shortened even if a comparatively hard reflection sheet is used and of which the reflection sheet is effectively prevented from being cracked or peeled from the supporting body. A reflector comprising: a supporting body (1) which has a base (11) and a plurality of projections (12) having a sloping surface (120), and a reflection sheet (2) disposed on the surface of the base and sloping sections (120) of the projections (12); wherein the length of the surface (10) between the projections in the direction of width is larger than the length of the projection in the direction of width, and the surface of the base (1) has at least one peripheral surface (101b) of each projection (12) extending along the periphery of the direction of width of the projections (12) at each of the projections (12); and the reflection sheet (2) further includes a peripheral section (22b) disposed on the peripheral surface (101b) of each projection, and the sloping section (21) of the reflection sheet (2) is linked with one (20a) of the two adjacent sections (20a, 20b) between the projections (12) and separated from the other section (20b) and the peripheral section (22b) of the projection.

WO 2004/029365 A1

A. CLASSIFICATION OF SUBJECT MATTER
 IPC 7 E01F9/03 E01F9/06

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
 IPC 7 E01F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

☒ Patent family members are listed in annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

G document member of the same patent family
